Learn about the latest in Assistive Technology for memory and aging all from the comfort of your home or office. Discover how you can immediately implement new techniques to assist your clients or loved ones.

**Awesome Reminding & Finding Apps, Devices, Accessories, & Strategies**

April 25, 2018 | 3:00 pm - 4:00 pm | $25

Many individuals struggle with remembering where they put their keys or cell phones or remembering to take medications or complete tasks at specific times. This session will discuss and demonstrate various apps, accessories, and devices to help you complete tasks on time, or find important items that you frequently misplace.

**Assistive Technology & Aging with a Disability**

May 15, 2018 | 3:00 pm - 4:00 pm | $25

As we get older, we all benefit from assistive technology solutions. However, individuals who experience a disability frequently benefit from a more coordinated plan of assistive technology services and supports. This session will discuss and demonstrate solutions to enable individuals who experience various disabilities to age in place. This includes the use of voice assistants; virtual participation; remote monitoring; devices for getting up into and out of; lifting, holding, and carrying solutions for arthritis; magnification and sound amplification solutions; solutions to reduce slips and falls; reminder devices and strategies, and back-saving solutions.

**Presenter:** Therese Willkomm, Ph.D., ATP, directs the Institute on Disability’s ATinNH program and is a clinical associate professor in the University of New Hampshire Department of Occupational Therapy. Known internationally as “The MacGyver of Assistive Technology,” Dr. Willkomm has provided AT services for over 30 years. She has appeared on RFD TV, CNN, NPR Science Friday and was invited to speak at the 2016 White House Summit on Technology and Disability.
