- May 18 Team Action Planning

### Instructors

Howard Muscott, EdD  
Heidi Cloutier, MSW  
Kathy Francoeur, MEd

### Cost

\$2,500/ team of 3–5  
\$3,500/ team of 6–8

NH schools are facing new challenges as they continue working to meet the complex social, emotional, and behavioral needs of students, and now with the added stress and uncertainty of an ongoing public health crisis. Failure to meet students' needs not only affects academic achievement, but can also result in negative outcomes such as mental health crises, substance misuse, dropping out of school, risky sexual behavior, and violence.

Addressing these needs has never been more important, and requires more than quick fixes.

**The MTSS-B framework has been shown to improve student engagement, create school climates and cultures that are positive and inclusive of all**

**students, improve student academic outcomes, and reduce behavioral issues.**

The MTSS-B framework can also help school staff to teach and support new routines and behaviors as schools respond to ever-changing health and safety guidelines from public health officials.

This interactive training is designed for school teams that are ready to support students who are exhibiting concerning behaviors by developing a systematic approach using evidence-based interventions and supports. Teams can use these sessions as part of their team's regular meeting times, and will receive guidance to develop and monitor interventions for students.
