If It's Worth Doing, It's Worth Doing Well

Register Now for Implementation Science Team Training

Description

For meaningful, lasting change to happen, certain structures and systems need to be in place from the outset and supported over time. Failed change efforts can be costly, not to mention demotivating for staff.

Understanding the key elements of implementation science and how to activate proven implementation strategies helps teams to protect the time, money, and energy they invest in their work.

This training will give teams the tools they need to apply a systematic approach to launching a new (or examining an existing) project or practice.

> *"My organization had for so long been 'building the plane as we fly.' I think we'll have much more success following this model in the future." – training participant*

Dates, Time, and Location

Five Thursdays monthly: Oct. 10, Nov. 7, and Dec. 4, 2024; Jan. 9 and Feb. 13, 2025
8:30–11:30 am | Online via Zoom

Cost*

$600/pp for teams of 3–6; $500/pp teams of 7+
*Teams representing NH's public-facing behavioral health system of care may be eligible for free training – please email us and tell us about your team and your project.

Who Should Attend

Teams of 3+ individuals who are working together to launch a new (or examine an existing) project or practice. Participants should have basic knowledge of the purpose of implementation science and a specific project to work with throughout the training.
