

The C-MIST Personal Planning Tool

The C-MIST personal planning tool assists you to consider what specialized items to add to a Stay Kit and Go Bag, and guides you through the creation of a personalized Emergency Plan. The planning tool consists of three steps:

Step 1: Assess

Use the space provided in the left column of each page to answer the prompting questions for the five C-MIST categories. Think about and write down what strengths and abilities the individual has, rather than writing needs or deficits. Focusing on strengths and abilities will help you to think constructively about planning in the following steps. For example:

Instead of:

*Person can't go anywhere alone
Person doesn't talk at all*

You write:

*Person's caregiver accompanies on all outings
Person responds to simple drawings*

Step 2: Brainstorm

After compiling a list of the person's strengths and abilities with the personal assessment in Step 1, brainstorm what the individual may need in order to maintain abilities and continue functioning in an emergency situation. Write your thoughts in the space provided. Consider answers to the following questions:

- *What might this ability look like in an emergency?*
- *What tools and strategies could help the person to stay safe and continue functioning?*
- *What information would be useful to a first responder?*

Step 3: Plan

Transform the information and strategies you came up with in Step 2 (anything you wrote in the right column) into action steps and concrete plans.
