Dear Colleagues and Friends:

It is a pleasure to present the Institute on Disability's (IOD) FY 2016 Report on Scholarly Activity and Engagement. As a more detailed companion piece to our annual report, this publication inventories the scholarly activities conducted between July 1, 2015, and June 30, 2016, and highlights the many ways the IOD faculty and staff worked to promote full access, equal opportunities, and participation for everyone.

Making meaningful contributions to the body of knowledge related to disability is a priority for the IOD. Through its grant-funded research, evaluation, and knowledge translation activities, the IOD raises awareness and bridges the gap between disability research and practice. The IOD makes use of a variety of traditional and new media tactics to maximize the reach, accessibility, impact, and application of its information and resources to a wide range of audiences. Highlights of our information sharing accomplishments include:

- Producing 52 publications including peer-reviewed journal articles and other creative work;
- Conducting 215 presentations to local, national, and international audiences.

The IOD is dedicated to preparing leaders in disability-related fields through innovative learning experiences, interdisciplinary teaching models, and programs of study that incorporate universal design principles, include self-advocates' perspectives, and employ varied instructional methods and formats. Highlights of our academic accomplishments include:

- Engaging in 35 teaching and training activities, including UNH courses and guest lectures;
- Providing 36 professional development trainings, in person and online, to 3,229 participants.

In addition to our publications and more traditional academic efforts, the IOD partners with organizations, government agencies, and local communities to help improve policies and service delivery models that impact individuals with disabilities. Highlights of our community engagement activities include:

- Serving on 86 local, state, and national committees and boards;
- Sitting on 31 editorial and grant review boards and committees.

Our accomplishments and effectiveness are largely attributed to the IOD's unique structure and federal mandate which include a world-class and passionate staff, a strong academic focus, and an unwavering community-based mission. This unique combination strategically positions us to effectively address both current and emerging priorities important to the disability community. With your continued support and partnership, we look forward to expanding this work in the years to come.

Sincerely,

Charles E. Drum, MPA, JD, PhD Director, IOD & Professor of Health Management and Policy
